THE RAIN CONTINUES

Game Concept Overview v2.0 (Neo-Pluvial Update)

GENRE: Survival Exploration
PLATFORM: PC / Console
PLAYERS: Single Player

The Concept

Fifteen years ago, the rain started and never stopped.

A shift in ocean-atmosphere coupling restructured the global cycle.

Everything below the 30th floor belongs to the water now.

- A systemic survival exploration game across a drowned city.
- Above: Traverse a decaying skyline of improvised bridges.
- Below: Dive into lightless interiors for critical salvage.

Tone & Aesthetic

Not post-apocalyptic. Post-adaptation.

People survive, build, argue, and adapt. Tension comes from holding the fragile together.

- Visual Palette: Concrete grey, rust orange, algae green.
- Audio Landscape: Rain is the inescapable baseline.
- No Guns: Conflict is environmental, structural, and social.

Core Pillars: Traversal & Physiology

Dual-State Traversal

Navigate between climbing, walking (3 m/s), and swimming (2 m/s).

Deep Physiological Systems

- Respiration: Manage air pockets and degrading rebreathers.
- Thermal: Wetness amplifies cold, leading to deadly tremors.
- Contamination: Toxic water builds bioaccumulation.

Weather as the Ultimate Antagonist

Weather isn't a skybox; it’s an active, cyclical threat.

Storm Surges:

- Raise the waterline by meters, submerging safe walkways.

Lightning:

- Strikes metal structures making sky-bridges lethal.

Fog Banks:

- Zero visibility post-storm, impacting navigation.

The Drowned City: Biomes

- Infrastructure Decay: Bridges collapse permanently over time.
- 1. Rooftop Canopy: Vine-covered safe traversal.
- 2. Mid-Rise Tidal: Rusted office floors, fluctuating tide.
- 3. Street-Level Marsh: Murky channels, ambush points.
- 4. Submerged Commercial: Dead dark, bioluminescence.
- 5. Deep Infrastructure: The abyss, extreme pressure.

Scavenging & Narrative

Everything degrades. The world is hostile to preservation.

Communities rely on the player's salvage and trade.

The Runner:

- Skyline missions balancing socio-political survival.

The Diver:

- Pushing into the alien abyss.

The Journal:

- Decrypting 'Project Deluge' from early flood years.
